INDEX TO VOL. II.

A.

Abbott, Mr. F., Note on the variable Star η Argus, 448.
Abel, Mr., Compounds of Copper and Phosphorus, 737.
Acid, Cobaltic, 456.
—— Liquefied Hydrochloric, 457.
Africa, Discoveries in Central, 93.
African Explorers, 287.
Agassiz, Professor, on the Metamorphoses of Fishes, 332.
Agricultural Returns, 646.
Agriculture, 70, 260, 432, 644.
Air, Analyses of, 222.
—— of Mines, 221.
Allen, H., M.D., Monograph of the Bats of North America (Review), 548.
Albert, T. C., on the Probable Conditions (past and present) of the Lunar Surface, 753.
Almaden Quicksilver Mines, 115.
Alps, Central Masses of the, 473.
Aluminium Ethide and Methide, 280.
—— Process for Manufacture of, 666.
—— Reducing Chlorides of, 123.
America, Mammals of South, 605.
Ammonia, Utilization of Liquefied, 499.
Analysis, Physical, of Human Breath, 129.
Anderson, Dr. T., on Cinchona Plantations at Darjeeling, 451.
Anhydrides, a New Reaction for the Production of, 282,
Annelida, Geographical Distribution of the, 135.
Ansell, Mr. G. F., Instrument for Indicating the Presence of Fire-damp, 483.
Ansted, Professor, Petroleum Springs in the Eastern Crimea, &c., 755.
Arctic Explorations, 291, 469.
Astronomical Society, 77, 266, 441, 652.
Astronomy, 73, 263, 437, 650.
Australia, Mammals of, 13.
Australian Coal Mines, 114.

B.

Baker, M. W., on Nickel in Lead, 88.
—— and Stuart, Messrs., on the Constitution of Steel, 88.
Barrett, Mr., Physical Analysis of Human Breath, 129.
Bassett, M., Process for Reducing Chlorides of Aluminium, 123.
Battery, a new Constant, 325.
Beale, Dr. L., on the Sarcolemma, 137.
—— Use of Dyes for the Examination of Organic Structures, 138.
—— Relation of Round and Caudate Nerve-cells, 330.
—— New Object Glass, 512.
Beck, Mr. P., on the Achromatic Microscope (Review), 546.
Becquerel, M., Thermo-Electric Piles of Sulphide of Copper, 698.
Beeches, Venation in the Different Kinds of, 83.
Bentham and Müller, Flora Australensis, &c. (Review), 167.
Belemnitidæ, Structure of the, 103.
Berard, M. A., Manufacture of Steel by means of Gas, 686.
Birds, Protective Value of Small, 431.
Bismuth, 309, 685.
Bisulphide of Carbon, Removal of, from Gas, 279.
Blasting Powder, a New, 87.
Blood Stains, Detection of, 205.
Bloxam, Professor C. L., New Method of Fusing Residues Insoluble in Water, 666.
—— Analytical Notes, 459.
—— Action of Chlorine on Arsenious Acid, 459.
Bonavia, Dr. G., Sericulture in Oudh (Review), 173.
Bonomi, Mr., Astronomy of Ancient Egyptians, 79.
Botanical Excursion to Eastern Lapland, 659.
Botany and Vegetable Physiology, 656.
Boulder, a Remarkable, in Canada, 271.
Boult, Mr., on the Submerged Forests on the Shores of Liverpool Bay and the Mersey, 677.
Bowditch, the Rev. W., on the Carburation of Gas, 124.
Bridgeman, Mr., on an Improved Lieberkuhn, 513.
Brine of Salted Meat, 89.
British Association, Bath Meeting, 175.
—— —— Birmingham, 727.

British Columbia, Explorations in, 100.
Broughton, Mr., on Production of Anhydrides and Ethers, 282.
Bryce, Dr. J., on Beds in West of Scotland beneath the Boulder Clay, 680.
—— Succession of Drift-beds in the Island of Arran, 679.
Buckman, Professor J., F.L.S., the Depredations of Insects and the Protective Value of Small Birds, 429.
Buckton and Odling, Messrs., on Aluminium Ethide and Methide, 280.
Bunsen, Professor, on Thermo-Electric Piles, 325,
British Association—Meeting at Bath, 1864 :—
Section A, 175
Section B, 176.
Section D, 177.
Sub-section D, 178.
Birmingham Meeting, 1865 :—
President's Address, 727.
Section A, 730.
Section B, 736.
Section C, 740.
Section D, 743.
Sub-section D, 743.
Section E, 746.

C

Cadmium, Easily Fusible Alloys of, 665, 695.
Callais, 310.
Calvert, Dr. F. Crace, Action of Silicate and Carbonate of Soda on Cotton Fibre, 458.
—— Method of Extracting Gold from Quartz, 113.
Canada, Entomology of, 519.
—— Flora of, 140, 516.
—— Geology of, 142, 520.
Canadian Fossils, 297.
Cannel Coal in North Wales, 526.
Carbonic Oxide, Dissociation of, 279, 321.
—— Mode of Recognizing in Blood, 692.
Carboniferous Strata, Distribution of, 22.
—— Floor and Margin of, 20.
—— Formations Lying over the, 24.
Carnivora of South America, 611.
Carpenter, W. B., F.R.S., &c., Principles of Human Physiology, &c. (Review), 154.
Carter, W., M.B., on a Plurality of Worlds, 227.
Cattle Foods, 435.
Cattle Plague, the, 647.
Cavern Accumulations, Introduction of, 530.
Cerebrum of Entellus Monkey, 562.
Chadburn, Mr., a New Oxy-Calcium Lantern, 127.
Chemistry, 86, 277, 456, 664.
Child, Dr., on Spontaneous Generation, 510.
Chili, Mineral Produce of, in 1861-2, 115.
Chiroptera, Families of, 609.
Chladnite, 118.
—— Reaction of, on Peroxide of Silver, 456.
Chlorine, Action of, on Arsenious Acid, 459.
Chlorophyll, 667.
Christy, Henry, 465.
Chronicles of Science :—
Agriculture, 70, 260, 432, 644.
Astronomy, 73, 263, 437, 650.
Botany and Vegetable Physiology, 81, 269, 448, 656.
Chemistry, 86, 277, 456, 664.
Entomology, 284, 461, 669.
Ethnology, 89.
Geography, 93, 287, 465.
Geology and Palæontology, 101, 296, 472, 674.
Mining, Mineralogy, and Metallurgy, 111, 306, 481, 682.
Physics : Optics, Heat, Electricity, 124, 316, 491, 689.
Zoology and Animal Physiology, 131, 327, 503, 699.
Science in Brazil, 704.
Science in British North America, 140, 516.
Science in the Provinces, 524.
Science Teachers' Association, 706.
Church, Professor A. H., Blue Colour of Forest Marble, 88.
—— Experiments to Ascertain the best Seed for Wheat, 644.
—— Tasmanite, 311.
Cinchona, Pitayo, 451.
—— Plantations at Darjeeling, 451.
Cinchonas, Number of, in Neilgherry Plantations, 273.
Climbing Plants, Organization of, 276.
Coal, the Ten Yards, 526.
Coal Measures of New South Wales, 480.
—— History of British, 19.
—— in Australia, 114.
Cobbold, Dr. T. Spencer, Entozoa : an Introduction to the Study of Helminthology, &c. (Review), 145.
—— on the Spread of Parasitic Diseases by the Use of Sewage, 334.
Cobaltic Acid, 456.

Coniferous Plants, Foreign, raised from Seeds ripened in Britain, 273.
Cooke, M. C., Rust, Smut, Mildew, and Mould, &c. (Review), 350.
Copper Mines of Cornwall, 112.
—— Smoke, Utilization of, 687.
Corals, Mineralization of, 108.
Coral Rag, 676.
Cottage Building, 648.
Cotton Fibre, Action of Silicate and Carbonate of Soda on, 458.
Crookes, W., F.R.S., Process for the Amalgamation of Gold, 486, 642.
Cross, Mr. R., Report on Pitayo Cinchona, 451.
Cruciferæ, Inflorescence of, 455.
Crustacea, Frontal Cord in the Parasitic, 136.
—— Metamorphoses of, 332.
—— Organs of Hearing of the, 333
—— Parasites of, 703.
Cytogenesis, 269.

D.

Dairy Farming, 70.
Dancer, Mr., Experiments on Pseudoscopic Vision, 497.
Darby, W. A., the Astronomical Observer, &c. (Review), 172.
Dareste, M., on the Co-existence of two Embryos upon a single Vitellus, 503.
Darwin, Mr., Organization of Climbing Plants, 276.
Daubeny, Dr., Essay on the Trees and Shrubs of the Ancients (Review), 551.
Dawes, Rev. W. R., on the Planet Mars, 653.
—— New Arrangement of Solar Prisms, 653.
—— on a New Eye-piece and Photometer, 654.
Dawkins, Mr. Boyd, on the Rhætic Beds of Western and Central Somerset, 109.
Dawson, Dr., on the Classification of Animals, 522.
Deaf and Dumb, Oral Instruction of the, 38.
De Candolle, Casimir, on Phyllotaxis or Leaf Arrangement, 656.
De la Rue, Mr. W., F.R.S., Visit to the Pulkowa Observatory, 75.
—— on the Behaviour of Sun Spots, &c., 439.
Desor, M., on the Alps, 473.
Deville, H. St. Claire, on Dissociation, 279, 321.
Deville, Phenomena of Dissociation in Homogeneous Flames, 498.
Devonshire, Denudation of Rocks in, 528.
De Vrij, Dr. J. E., on the Cultivation of Quinine in Java and British India (Review), 348.
Diamond, Dilatation of, under the Influence of Heat, 695.
—— Organic Nature of the, 686.
Dibbitts, Mr., on the Spectra of the Flames of various Gases, 124.
Dickson, Dr., on Andrœcium of Mentzelia, 450.
—— Development of Flower in Mentzelia Aurea, 276.
—— Investigations on Malope and Kitaibelia, 84.
Didymium, Spectrum of, 493.
Dimorphism in the Gall Insects, 135.
Dircks, H., C.E., the Life of the Second Marquis of Worcester (Review), 537.
Draper, Henry, M.D., American Contributions to Spectrum Analysis, 395.
—— Petroleum: its Importance, its History; Boring and Refining, 49.
Dumas, M. A., Electric Safety Lamp, 307.
Dyes, Use of, for the Examination of Organic Structures, 138.

E.

Edentata of South America, 619.
Electricity, 130, 325, 499, 697.
Elements, Refractive Energies of, 492.
Entomology, 284, 461, 669.
—— of Adelaide, 134.
Eozoön Canadense, the, 302.
Erbium, Spectrum of, 493.
Esquimaux, Origin and Migration of the Greenland, 295.
Etna, Eruption of, 290, 467.
Ethnology, Principles of, 91.
Evansite, 120.
Eye-piece, New, for viewing the Sun, 81.

F.

Fagge, C. H., M.D., on the Probable Existence of the Repetition of Octaves in the Solar Spectrum, 82.
Falconer, Dr., on Species of Mastodon and Elephant occurring in Great Britain, 681.
Farrar, Rev. Mr., on Fixity of Type, 92.

Fatty Matters, Oxidation of, 668.
Fauna of the Swiss Pfahlbauten, 257.
Ferns of Southern India, 663.
Ferric Salts, Reaction of Ferricyanide of Potassium on, 281.
Filippi, Professor de, on the Relation of Man to the Lower Animals, 131.
Fire-damp, Instrument for Indicating Presence of in Mines, 483.
Fire-flies, 671.
—— Spectrum of Light emitted by, 124.
Fishes, Duration of Life in, out of Water, 701.
—— Metamorphoses of, 332
Fitzroy, Admiral, 465,
Flammarion, C., La Pluralité des Mondes Habités, &c. (Review), 346.
Fleitmann, New Method of obtaining Oxygen, 456.
Flint Implements, Recent Discoveries of, in England, 107.
Flounders, on the Upper Eye of, 506.
Foot, R. B., Geology of Districts of Trichinopoly, &c. (Note), 762.
Fossils, Welsh Lingula-flag, 107.
Fumariacæ, Flowers of, 454.

G.

Gall-flies, Dimorphism of, 669.
Galton, Mr., Spectacles for Divers, &c., 734.
Gas, Removal of Bisulphide of Carbon from, 279.
Gassiot, Mr., Description of a Rigid Spectroscope, 693.
Geikie, A., F.R.S., the Scenery of Scotland, &c. (Review), 715.
Geology, 101, 296, 472, 674.
Geology of Canada, 142.
—— Swiss, 474.
Gibbon, Habits of the, 132.
Gladstone, Dr., and Rev. J. P. Dale, on Refractive Energies of Elements, &c., 492.
Glaisher, Mr. J., Report on Luminous Meteors, 731.
—— Report of Balloon Committee, Brit. Ass., 735.
Gold, Extraction from Quartz, 113.
—— British, Hunt on, 635.
—— Crookes's Process for the Amalgamation of, 486, 642.
—— Welch Mines, 112.
Gordon, Miss, Railway Signals, 589.
Gore, Mr., on Liquefied Hydrochloric Acid, 457.
Grindon, Leo H., British and Garden Botany (Review), 168.
Grisebach, A. H. R., M.D., Flora of the British West Indian Islands (Review), 166.
Guano, Value of, 647.
Gunpowder, Non-explosive, 666.
Guyon, M., on the Poison of Scorpions, 333.

H.

Haast, Dr., Geology of New Zealand, 479.
Hall, Professor J., on the Graptolitidæ, 297.
Haloid Salts of Copper, Action of Light on, 125.
Harrison, Mr., on Dairy Farming, 70
Harvey, W. H., Flora Capensis (Review), 555.
Haughton, Rev. Dr., on Leg of Ostrich, 505.
Heat, 128, 320, 498, 694.
—— Invisible Radiation of, 320.
Hector, Dr., Geology of Otago, 480.
Hensen, Dr. V., on the Organ of Hearing in the Crustacea, 333.
Heer, Professor, on Plants found under Lacustrine Habitations in Switzerland, 85.
Herschel, Mr. A. S., on Radiant Points of Shooting Stars, 266.
—— Sir J. W., Catalogue of Nebulæ and Clusters of Stars, 74.
—— New Eye-piece for Viewing the Sun, 81.
Hees, Professor, on Radiant Points of Shooting Stars, 80.
Hincks, the Rev. T., B.A., Zoophytes: the History of their Development, 401.
Hochstetter, Dr., Geology and Palæontology of New Zealand, 476.
Hofmann, Dr. A. W., on Lecture Experiments, 282.
Holl, Dr., on the Malvern Hills, 305.
Hooibrenk's Process, Experiments on, 645.
Hooker, J. D., M.D., F.R.S., Handbook of the Flora of New Zealand, &c. (Review), 162.
Hothouse Flora, 558.
Huggins, Mr., on the Question of a Lunar Atmosphere, 267.
—— Prismatic Examination of Microscopic Objects, 512.
—— Physical and Chemical Constitution of Fixed Stars and Nebulæ, 689.
Hull, Edward, B.A., on Drift Deposits, 677.
—— the History of the British Coal Measures, 19.
—— on the Iron-bearing Deposits of Oxfordshire, 360.
—— on the New Red Sandstone as a Source of Water Supply, 418.

Hunt, Robert, F.R.S., British Gold, 635.
Huxley, Professor, on Structure of the Belemnitidæ, 103.

I.

Imponderables, New Theory of, 697.
India Rubber, on the Oxidation of, 283.
Indigo, New Method of Valuing, 667.
Insects, Depredations of, 429.
—— Origin of the Respiratory Movements of, 135.
Indium, 87, 457, 664.
—— Wave Length of Blue Line of, 692
Iron, Canadian, 143.
—— Castings, Method of Hardening, 122.
—— Conversion of, into Steel, 86.
—— Fusion of, by the Agency of Steam, 490.
—— Per- and Prot-Oxide of, Determination of, by Spectrum Analysis, 203.
—— Tubes, New Mode of Making, 687.

J.

Jamieson, Mr., on the last Geological Changes in Scotland, 678.
Jenkins, H. M., F.G.S., on the Occurrence of a Tertiary Species of Trigonia in Australia, 362.
—— Strata identified by Organic Remains, 622.
Jerusalem, Survey of, 466.
Jourdain, M., on the Eyes of the Starfish, 334.
Jupiter, Physical Constitution of, 234.

K.

Kett, Rev. C. W., M.A., Prehistoric Records, 239.
—— the North Pole, 631.
King, W., jun., and Foot, R. B., on the Geological Structure of the Districts of Trichinopoly, Salem, and Arcot (Review), 338. Note, 762.
Kölliker, Professor, Icones Histiologicæ, &c. (Review), 532.
Kuhlmann, Mr., on Crystallization, 126.

L.

Ladders, Effects of Use for ascending and descending Mines, 63.
Lamp, Safety, Electric, 307.
Lankester, E. Ray, on Cerebrum of Entellus Monkey, 562.
—— on Sources of Mammalian Fossils of the Red Crag, 680.
Lantern, a New Oxy-calcium, 127.
Lapland, Botanical Excursion to Eastern, 659.
Lawes, Mr., Experiments on the Hooibrenk Process, 645.
Lead, Action on Water, 457.
Leaves, Colouring Matters of, 667.
Lecture Experiments, 282.
Light, 124, 316, 491, 689.
—— Application of Polarized, with the Spectrum, 205.
Lightning, Deaths by, 698.
Lindsay, Dr. W. L., on Flora of Otago, 272.

M.

Mackenzie, Mr. J., on the New South Wales Coal Fields, 358.
McNab, Mr. J., on Foreign Coniferous Plants raised from Seed ripened in Britain, 273.
Magnesia, Solubility of, in Alkaline Salts, 281.
Magnesium, Thermic Equivalent of, 695.
Mahanuddy, Basin of the River, 291.
Mammal, the oldest known, 109.
Mammals of Australia, 13.
—— South America, 605.
Man-Engine, 60.
Manures, Experiments with, 432.
Marcet, Dr., on Brine of Salted Meat, 89.
Marcus, M. S., a New Thermo-pile, 502.
Martin, M. E., an Electro-Chemical Study of the Elements, 501.
Martins, C., Deux Ascensions Scientifiques au Mont Blanc, &c. (Review), 554.
—— Flowering Plants of the Jardin of the Mer de Glace, 658.
—— on Temperature of Soil on Mountains, 271.
—— Vegetation of Spitzbergen compared with that of the Alps and Pyrenees, 661.
Mars, Physical Constitution of, 231.
—— the Planet, 369.
Marsh, G. P., Man and Nature, &c. (Review), 156.
Marsupials of Australia, 14.
Medlicott, H. B., A.B., on the Structure and Relations of the Southern Portions of the Himalayan Ranges (Review), 338.

Mentzelia, Development of Flower in, 276.
Mer de Glace, Flowering Plants of the Jardin of, 658.
Metals, Action of Sea-Water on, 457.
—— Coating one with another, 87.
Metal Miners, on the Health of, 216.
—— Mining, 59.
Metalliferous Mines Bill, 481.
Metallurgy, 122, 314, 489, 686.
Metamorphic Rocks, Chemical and Mineralogical Relations of, 299.
Meteorite, the Orgueil, 77, 271.
Meteorolites, 117.
Meteors, Report on Luminous, 731.
Merionethshire, Gold Mines of, 638.
Microscope, the, 512.
Milk, Yield of, 70.
MILLER, Dr. W. A., on Analysis of Potable Waters, 460.
MILTON, Viscount, Explorations of Means of Communication between Canada and British Columbia, 100.
Minerals, New Cornish, 119, 312.
Mineral Springs of Nova Scotia, 141.
—— Statistics for 1864, 682.
Mineralogy, 117, 309, 487, 685.
—— of South America, 309.
Mines, Air of, 221.
—— Methods of Descending, 60.
—— Number of Deaths by Violence in, 219.
——Work in, 66.
Mining, 111, 306, 481, 682.
Moa, Egg of, 331.
Mont Blanc, Scientific Ascents of, 554.
Montpellier, Flora of, 448.
Moon, Atmosphere of the, 267.
—— Evidences of Continued Volcanic Action in the, 77.
—— Physical Constitution of, 231.
MORREN, M., on Phosphorescence of Rarefied Gases during Passage of the Electric Spark, 500
Mule, Foal produced by a, 330
MÜLLER, Dr. F., Observations on the Crustacea in Relation to Darwin's Theory, 508.
Muscology, 558.
Musical Organs of Insects, 671.
—— Sounds, on the Quality of, 591.
Nickel in Lead, and its Removal, 88.
Niobium, 665.
Nitroglycerine for Blasting, 684.
NOAD, HENRY M., Ph.D., a Manual of Chemical Analysis, &c. (Review), 171.
North Staffordshire Coal-fields, Distribution of Organic Remains in, 527.
NOTES AND CORRESPONDENCE:—
On the Probable Existence of the Repetition of Octaves in the Solar Spectrum. By C. Hilton Fagge, M.D., 182.
On the Vast Antiquity of the Lunar Surface. By James Nasmyth, 183.
Reform in the Committee of Council on Education, and the Science and Art Department, 355.
On the Connection between the supposed Inland Sea of the Sahara and the Glacial Epoch. By Rev. Horatio J. Ward, M.A., 357.
On the New South Wales Coal Fields. From Mr. John Mackenzie, Government Examiner of Coal Fields, New South Wales, 358.
On the Iron-bearing Deposits of Oxfordshire. By E. Hull, B.A., F.G S., 360.
On the Occurrence of a Tertiary Species of Trigonia in Australia. By H. M. Jenkins, F.G.S., 362.
On the Cerebrum of the Entellus Monkey. By E. Ray Lankester, 562.
The Sahara and the North-East Trade Wind. By W. Pengelly, F.R.S., F.G.S., 565.
On Petroleum Springs in the Eastern Crimea, and on the Shores of the Sea of Azof. By Professor D. T. Ansted, F.R.S., 755.
On the Probable Conditions (Past and Present) of the Lunar Surface. By T. Clifford Allbutt, M.A., M.B., 753.

N.

NASMYTH, JAMES, on the vast Antiquity of the Lunar Surface, 183.
Nebulæ, Physical and Chemical Constitution of the, 689.
—— Spectra of, 316.
New Zealand, Geology and Palæontology of, 476, 479, 480.

O.

OLDHAM, Dr. T., Annual Report of the Geological Survey of India for 1863-4 (Review), 338.
Operculum of Univalve Shells, Homologies of, 701.
Organic Remains, Distribution of, in North Staffordshire Coal Fields, 527.

ORIGINAL ARTICLES :—
The Science and Art Department, 1.
On the Mammals of Australia. By P. L. Sclater, M.A., Ph.D., F.R.S., 13.
On the History of the British Coal Measures: being an Account of the Range and Distribution of the Coal Formations beneath the more Recent Strata of the Central and Southern Counties of England. By Edward Hull, B.A., F.G.S., &c., 19.
On the Causes of Britain's Greatness: a Review of the Relations of her Geology and Geography to her History. By William Pengelly, F.R.S., &c., 27.
On the Oral Instruction of the So-called Deaf and Dumb; being some Account of the System of Tuition by Lip-reading and Articulation. By Gerard Van Asch, 38.
Petroleum: its Importance; its History; Boring, Refining. By Henry Draper, M.D., 49.
On Metal Mining. By Dr. R. Angus Smith, F.R.S., &c., 59.
Science, Politics, and Religion, 187.
On the Application of Spectrum-Analysis to Microscopical Investigations, and especially to the Detection of Blood-stains. By H. C. Sorby, F.R.S., &c., 198.
On the Health of Metal Miners. By R. Angus Smith, Ph.D., F.R.S., 216.
On a Plurality of Worlds. By William Carter, M.B., B.Sc.L., 227.
Pre-Historic Records. By Rev. C. W. Kett, M.A., 239.
The Planet Mars. By John Phillips, M.A., Oxon., F.R.S., 369.
On the Predisposing Causes of Pestilence, 381.
American Contributions to Spectrum-Analysis. By Henry Draper, M.D., 395.
Zoophytes: the History of their Development. By the Rev. Thomas Hincks, B.A., 401.
On the New Red Sandstone as a Source of Water Supply for the Central Towns of England. By Edward Hull, B.A., F.G.S., 418.
ORIGINAL ARTICLES, *cont.*—
The Depredations of Insects, and the Protective Value of Small Birds. By Professor James Buckman, F.L.S., F.G.S., 429.
On Circulation and Communication in Railway Trains. By Captain Tyler, R.E., 571.
On the Quality of Musical Sounds. By W. S. Squire, Ph.D., F.C.S., 591.
The Mammals of South America. By P. L. Sclater, Ph.D., F.R.S., 605.

LIST OF PLATES IN VOLUME II.

	PAGE
Typical Mammals of Australia. By Wolf.	*Facing page* 13
Map showing the Area of the Coal Formation at the Close of the Carboniferous Period	26
The Man-Engine for the Descent and Ascent of Miners	61
Diagram showing Weekly Yield (during Three Years) of Milk per Cow	71
—— —— Proportional Numbers of Miners Living at Four Periods of Life in Four Mining Districts, compared with Sixty-three Healthy Districts	221
The Planet Jupiter. By Mr. Warren De la Rue	227
The Planet Mars. By Mr. Warren De la Rue	232
Relics and Restorations of the Stone and Bronze Ages. By C. W. Kett	239
Chart of the Planet Mars. By Professor Phillips	380
Typical Zoophytes and their Development. By Rev. T. Hincks	401, 409
Patent Electrical Couplings for Railway Carriages. By Captain Tyler	588
Typical Mammals of South America. By Wolf	621
Fossil Shells. By H. M. Jenkins	630

LIST OF WOODCUTS, &c., IN VOLUME II.

	PAGE
The Structure of Belemnites. *Two Figures*	104
The Affinities of Hypsiprymnopsis Rhæticus. *Three Figures*	110
Spectrum Microscope	199
Blood Spectra	207
Spectrum of Jupiter	235
Portion of Specimen of Eozoön Canadense	303
Diagram Explanatory of Structure of Eozoön Canadense	*ib.*
Section of the Disc and Radiating Outgrowths of Calcarina	*ib.*
Physical Aspect of Mars. *Six Figures*	376, 378, 379
Section across Wall Grange Spring, near Leek	422
General Section of a Well, with Chambers and Bore-hole	423
Entire Leaflets of an uninjured Pea-plant	429
Pea-leaves eaten by the Pea-weevil	430
Appearance of a Spot on the Sun	443
Sketch-map of a Portion of the Alps, showing the Relationship of some of the principal "Central Masses"	473
Section across the St. Gothard Pass (after Desor)	474
Ansell's Fire-damp Indicator	484
Ditto ditto *Four Cuts*	485

PAGE

General Form of the Cerebrum of the Entellus Monkey 563
Outline of Internal Folds and Fissures of the Cerebrum of the Entellus Monkey 564
Lateral Ventricles of the Cerebrum of the Entellus Monkey 565
Voltaic Apparatus used for Train-signals on London and South-Western Railway 588
Helmholtz's Resonators 595
Section across the Valley of Beshevli 757
Plan of Lake Tchongolek 759
Section across part of the Shore of Lake Tchongolek 760
